

INDEX

S.No	Lab Task	Aim	Date	Teacher's Signature
1	Lab Task 1	Exploratory Data Analysis using numpy and pandas in Python.	08/01/26	
2	Lab Task 2	Data Splitting & Evaluation: Import a CSV dataset and inspect rows, columns, and data types.	15/01/26	
3	Lab Task 3	Performance Measures (Without Any Model): Calculate evaluation metrics using given Actual and Predicted outputs.	22/01/26	
4	Lab Task 4	Implement Linear Regression from scratch using mathematical formulation.	29/01/26	
5	Lab Task 5	Logistic Regression and Gradient Descent.	05/02/26	
6	Lab Task 6	Naïve Bayes and SVM.	12/03/26	
7	Lab Task 7	Q-Learning using Grid World.	19/03/26	
8	Lab Task 8	To implement and compare Perceptron and Multilayer Perceptron (MLP) models.	02/04/26	
9	Lab Task 9	Heuristic Search (DFS, Best First, A*).	09/04/26
